In the article, the main aspects of the activity of joint-stock companies in the territory of independent Ukraine are revealed. The article explores the peculiarities of the start of joint-stock companies, their further development, assesses the dynamics of the main indicators of the activity of this type of enterprise, and generalizes development problems.

The goal of the article is conducting research on the formation and development of joint-stock companies in Ukraine, elucidating the specifics of the existence of this form of entrepreneurship and analysing the main problems that arose in Ukraine during the development of joint stock relations, and generalizing the directions for their improvement. Further, the historical aspects of the formation of legislation in relation to joint-stock companies are examined and the impact of regulatory legal acts on the dynamics of their

activities is examined. The authors summarize the positive and negative aspects of the functioning of this type of business.

In the next part of the work, the trend of changing the number of joint-stock companies in terms of their types is considered; the dynamics of registered shares and the volume of output, the amount of paid dividends are analysed. The authors give illustrations, confirming the characteristics and trends of development of this type of entrepreneurship.

In the final part of the article, the main problems of the activity of joint-stock companies in Ukraine are generalized. Thus, an exhaustive list of proposed methods for neutralizing the described shortcomings is obtained with the aim of securing the development of joint-stock companies to a new level.
